Technical

SEG is a great source of technical news for geophysicists. Exhibitions, publications, scientific updates, and links to other geophysics internet pages are just some of the benefits SEG uses to help geophysicists advance the science and their own knowledge.

Related Link: SEG Meetings

International Exhibitions and Annual Meetings

New geophysical equipment and services are the mainstay of SEG's annual exhibitions. SEG also sponsors or lists many other geophysics-related meetings and expositions.

Related Link: SEG Meetings

Technical Standards

A complete list of SEG standards may be found at the following page.

Related Link: Technical Standards

Continuing Education

SEG offers several opportunities for continuing education courses and reading materials.

SEAM

The SEG Advanced Modeling Project (SEAM) is a cooperative industry effort to construct a subsurface model and generate synthetic data sets.

SEG-D and SPS standards

The SEG Executive Committee has approved updates to the SEG-D and SPS technical standards, both labeled Revision 2.1. The SPS (Shell Processing Support) format is updated for compatibility with the updates to the SEG-D format. Both are available for download.

Geophysical Consortia

This international page is intended to facilitate internet communication between petroleum / natural gas companies and groups doing nonproprietary exploration geophysics research, such as academic consortia, university research groups, laboratories, institutes, government
